MANAS BHAVSAR

Software Engineer | Full Stack Developer | React & Python

manas.bhavsar45@gmail.com | +91 8780957843 | linkedin.com/in/manas-bhavsar-21a9a53a4 | github.com/Manas-bhavsar

PROFESSIONAL SUMMARY

Final-year Computer Engineering student with hands-on experience building full-stack web applications, component libraries, and AI-powered tools. Proficient in React.js, Next.js, TypeScript, Python, and Flask. Passionate about clean UI, scalable architecture, and developer tooling. Actively seeking entry-level Software Engineer roles to apply and grow technical expertise.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, PHP, Java, Kotlin, SQL

Frontend: React.js, Next.js 15, Tailwind CSS, Framer Motion, HTML5, CSS3

Backend: Flask, Node.js, PHP, REST APIs

Databases: MySQL, localStorage-based state management

Tools & Platforms: Git, GitHub, Vercel, Arduino, Google Colab, XAMPP, npm

UI Libraries: ShadCN UI, MARK UI (self-built), Framer Motion

WORK EXPERIENCE

PHP Developer Intern — Ingenious Erectors Jun 2024 (1 Month)

- Developed a School Attendance Management System using PHP and MySQL from scratch.
- Built admin and teacher dashboards with CRUD operations for managing student attendance records.
- Implemented session-based authentication and role-based access control for secure data handling.
- Delivered a functional internal web tool deployed on a local XAMPP server within a one-month timeline.

PROJECTS

MARK UI — Motion-First React Component Library 2024 – Present

Tech Stack: Next.js 15, TypeScript, Tailwind CSS, Framer Motion, npm

- Designed and built a production-ready React component library with 18+ animated UI components published as @markui/core on npm.
- Implemented motion-first design principles using Framer Motion, enabling plug-and-play animations for React applications.
- Developed a full documentation site with 6 launch themes, live previews, and usage guides deployed on Vercel.
- Structured the library for tree-shaking, TypeScript support, and seamless integration with Tailwind CSS projects.

RESUKNOW — AI-Powered Resume Analyzer LJ Innovation Village 2023

Tech Stack: React.js, Flask, Python, OCR, MySQL

- Built an end-to-end AI resume analysis platform with role-based access for Admin, HR, and Job Seekers.
- Integrated OCR-based resume parsing using Python to extract and analyze key candidate information automatically.
- Developed a Flask REST API backend handling resume uploads, parsing logic, and storing structured data in MySQL.
- Presented at LJ Innovation Village college tech event, receiving recognition for practical real-world applicability.

EDUCATION

B.Tech in Computer Engineering Expected: 2027

Ganpat University of Technology, Mehsana | Current CGPA: 7.4 (Sem 3)

Diploma in Computer Engineering Graduated: 2024

LJ Polytechnic, Ahmedabad | Overall SPI: 7.9

ACTIVITIES & LEADERSHIP

- Core Member, PR Team — Ganpat University Tech Community: Managing communications, social media, and event promotion for the college tech community.
- Participated in LJ Innovation Village (2 consecutive years) — Built and presented real-world software projects including RESUKNOW (AI Resume Analyzer) and a WordPress-based Ticket Booking System.
